ECS

ECS CLOUD

Next-Gen Cloud Optimized for Zero Trust Architecture

Public sector and enterprise organizations require cloud-based solutions delivered securely as a service. ECS is the next-gen managed service provider with Cloud partnerships, cybersecurity expertise, and managed services frameworks to deliver the transformational potential of cloud computing.

With ECS' cloud-as-a-service model, you can securely host your most sensitive workloads and applications in the cloud, increase the scalability and agility of your operations, accelerate your time-to-value, and create new ways to solve problems.

OUR SOLUTION

ECS combines cloud excellence with cybersecurity capabilities and innovative managed service models. We lead the industry in securely integrating cloud-based innovation in mission-critical environments.

Our cloud-as-a-service capabilities include:

Multi-Cloud Management
Enable consistent multi/hybrid cloud management through established management activities.

Enterprise Cloud Security
Secure the cloud with zero-trust best practices including continuous authorization and micro-segmentation.

Cloud Modernization
Leverage cloud-native services, serverless architectures, and enterprise refactoring.

Cloud Migration
Transfer mission-critical data, applications, and workloads to from on-premises infrastructure to the cloud or from one cloud to another.

We also partner with the industry's leading platforms, providing our customers with powerful, secure, and flexible options, with expertise backed by more than 1,000 cloud certifications and accreditations.
