

The logo for ECS, featuring a stylized 'E' icon followed by the letters 'ECS' in a bold, white, sans-serif font, all contained within a red rectangular box.

ECS

ECS CYBER

**GOVERNANCE, RISK MANAGEMENT,
AND COMPLIANCE**

Ensure your organization is aligned with industry-leading security regulations, authoritative frameworks, and certifications. Don't settle for an ad hoc, siloed approach that leaves you vulnerable. Make the move to an integrated, agile governance, risk management, and compliance (GRC) model rooted in organizational values, a mindset of continuous improvement, and technological innovation.

OUR SOLUTION

ECS has over 20 years of experience supporting Department of Defense (DoD) contractors in GRC. Our commitment to quality assurance is backed by an ongoing investment in the processes, standards, and certifications that ensure excellence.

ECS provides GRC as a managed service, working with your teams to identify your organization's value drivers and develop a strategy to achieve GRC resilience, including:

- Understanding your risk profile.
- Introducing accountability and behavioral incentives throughout your infrastructure.
- Ongoing monitoring and reporting to ensure quality assurance.

CMMC COMPLIANCE

ECS is a Cybersecurity Maturity Model Certification (CMMC) Registered Provider Organization (RPO) with trained Registered Practitioners (RPs) ready to help your organization navigate the path to CMMC compliance, including the DoD Defense Federal Acquisition Regulation Supplement (DFARS) Clause, the National Institute of Standards and Technology (NIST) 800-171 assessment, and the CMMC audit.

Our CMMC compliance services include:

Preparedness Evaluation

Our expert personnel will analyze how your people, processes, and technology align with the practices of the CMMC.

Compliance Consultation

We help identify what controls your company should implement to reach your ideal certification level.

Assurance Support

We help you establish a remediation roadmap — including plans of action and milestones (POA&M) — to mitigate risks and ineffective controls.

SSP Documentation

We help you to document strategies, standards, and policies to meet the requirements of the CMMC and enhance your cybersecurity practices.
