

ARMY ENDPOINT SECURITY SOLUTION

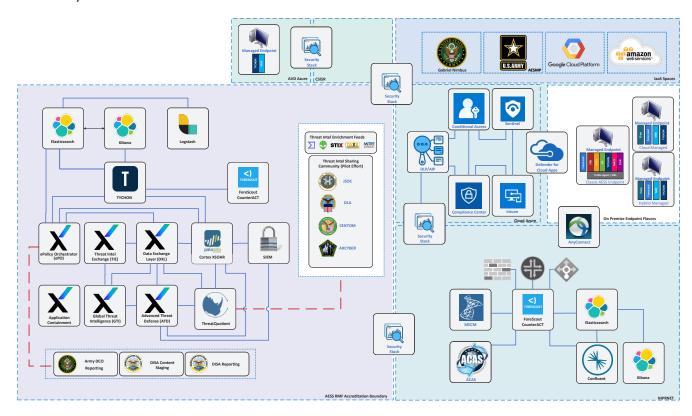

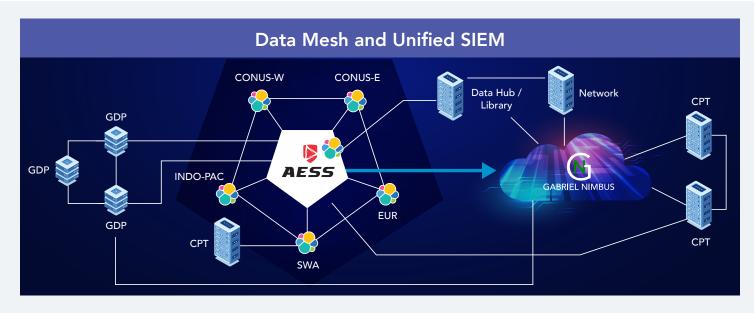

ZERO TRUST SECURITY CONNECTED DEFENSE

HYBRID MULTI-CLOUD SECURITY AND ZERO TRUST ARCHITECTURE

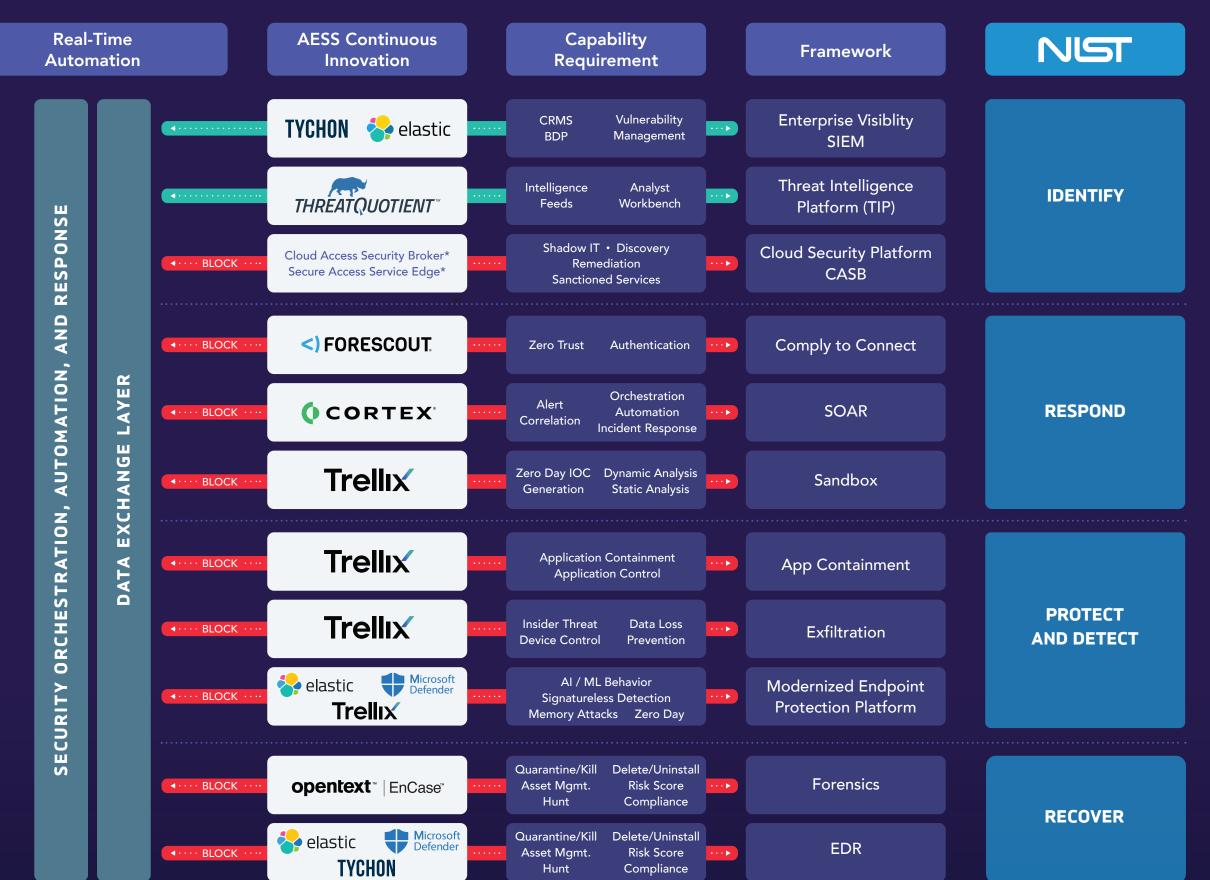

ECS's ZTA solution provides a unified and integrated platform to provide security of assets and data in a hybrid multi-cloud environment. The architecture provides endpoint security, visibility and remediation for Flow 1 (GFE on NIPRnet), Flow 2 (GFE on VPN) and Flow 3 (GFE not on VPN and BYOD).

ARMY ENDPOINT SECURITY SOLUTIONZERO TRUST HYBRID CLOUD REFERENCE ARCHITECTURE

^{*} Completed Integration Testing in AESS Lab, not deployed

AESS is the only deployed cybersecurity solution to offer all endpoint security and management capabilities required by Joint Forces HQ DoDIN/DISA.

Threat Detection and Protection:

- Moving from detection to engagement in milliseconds by convicting and blocking malicious activity at the lowest level in the stack
- Isolating and process-recording suspicious activity for additional analysis via sandboxing or by an analyst
- Automatic reversal of unauthorized endpoint changes
- Orchestration and response integration to automate playbooks and analyst workflows
- Tailored thresholds determine automatic remediation or assignment to analysts for manual investigation

Asset Management and Maintenance:

- Inventorying all hardware and software for each endpoint; journaling all changes
- Collecting hygiene data from endpoint to enterprise in the Automated Cyber Hygiene and Risk Scorecards

Information Sharing and Reporting:

- Generating indicators of compromise (IOC) and instantaneously sharing them across the global Data Exchange Layer
- Sharing indicators and external data from the intelligence community, commercial databases, and third-party feeds on the Threat Intelligence Platform

OPERATING WORLDWIDE TODAY

Deployed worldwide on NIPRnet and SIPRnet, the Army Endpoint Security Solution (AESS) provides Regional Cybersecurity Centers (RCC) with the most advanced tools and discovery capabilities for comprehensive cybersecurity protection, detection, and remediation. ECS delivers a managed service with 24/7/365 Tier 2 and 3 support, analyst/DCO training and all Operations and Maintenance.

User	Device	Network	Application & Workload	Data	Visibility & Analytics	Automation & Orchestration

ECS delivers advanced solutions in cybersecurity, cloud, artificial intelligence (AI), machine learning (ML), application and IT modernization, science, and engineering. ECS is an award-winning partner with strategic experience and technical expertise in the deployment and management of cybersecurity products. We are committed to simplifying cybersecurity for every client and providing consulting, managed services, and resale to meet each organization's individual needs.
