## **G.25 ENVIRONMENTAL OBJECTIVES AND REQUIREMENTS**

In support of Executive Order 13834, Efficient Federal Operations, and other applicable statutes, regulations and Executive Orders, and in recognition that environmental damage and related supply chain risks, including from energy market volatility, greenhouse gas pollution, and electronic equipment manufacturing and disposal, have quantifiable costs and negative impacts on the economy and federal agency operations, it is the Government's intent to understand and reduce as far as practicable the energy and environmental impacts of IT services provided under this contract. Contractor shall provide evidence of ongoing measurement and reduction of the energy and environmental impacts of services provided, including but not limited to, use of energy and nonrenewable resources and emissions of carbon pollution, via annual Sustainable Practices and Impact Disclosures.

The Sustainable Practices and Impact Disclosures shall be submitted online using any of the systems listed below. These online reporting portals provide efficient means for contractors to share standardized Disclosures with the delegated GWAC Ordering Contracting Officers.

- a) Carbon Disclosure Project (CDP) [www.cdp.net](http://www.cdp.net)
- b) Posting the disclosure, or a link to the disclosure, on the Contractor's GWAC web site.

Not all individual content specified in the CDP reporting system is required by GSA. Detailed content required by GSA is specified under Milestone Deliverables below. Greenhouse gas inventories required under the Milestone Deliverables shall be prepared in accordance with the World Resources Institute/World Business Council for Sustainable Development Greenhouse Gas Protocol Corporate Accounting and Reporting Standard, ISO 14064 standard, or similar GHG reporting standard.

Within 12 months of the Master Contract Notice to Proceed, the contractor shall submit online its corporate-wide Sustainable Practices and Impact Disclosures, and provide notification to the GWAC Program at [Alliant2@gsa.gov](mailto:Alliant2@gsa.gov) as to when the disclosure was submitted and the online reporting option used. Thereafter the Contractor shall update the Disclosure annually until the expiration of the Master Contract.

The value of the above disclosures is the methodical identification, quantification and management of use of energy and nonrenewable resources, emissions of pollutants, and opportunities to save money by improving contractor's energy efficiency and other aspects of corporate operations. GSA will review the Disclosures, and work with the Contractors to assist them in their identification of environmental and sustainability measures that best address GSA's environmental and climate change initiative goals.

The Contractor shall meet the following milestones with regard to contents of the annual Sustainable Practices and Impact Disclosures:

1. Within 12 months after the Notice to Proceed - initially filed Disclosures and all future Disclosures must be publicly available online via Contractor or third-party Web site
2. Within 12 months after initially filed Disclosures - Disclosures must include a complete Greenhouse Gas (GHG) inventory
3. Within 24 months after initially filed Disclosures - Disclosures must include a GHG reduction target(s) (either for reduction of absolute annual quantity of greenhouse gas emissions, and/or for reduction of "carbon intensity" i.e., reduction of carbon footprint per activity measure such as sales, number of employees, square feet of facilities, etc.)
4. Within 36 months after initially filed Disclosures - Disclosures must report on progress towards meeting the GHG reduction target(s), and as specified in Section F.7.

GHG inventories and targets referenced above must include Scope 1 and 2 GHG emissions. Inclusion of Scope 3 emissions categories is encouraged but not required. The Government will accept a disclosure from the Contractor's parent company in satisfaction of Milestone 1. For Milestones 2 and beyond, GSA will continue to accept a disclosure from the Contractor's parent company as long as the parent company's GHG emissions inventory boundaries (financial and geographic) include activities the Contractor performs under the GSA GWAC Task Orders. The Contractor shall be evaluated in the Contractor Performance Assessment Reporting System (CPARS) or another contract performance assessment report on its compliance to timely submission of the Sustainable Practices and Impact Disclosures and milestone deliverables.
