

OPEN SOURCE INTELLIGENCE SOLUTIONS

Turning Public Data into Mission-Ready Intelligence

Federal teams face increasing pressure to transform publicly available information (PAI) and commercial data into trusted, actionable intelligence, faster and with greater confidence. ECS Open Source Intelligence (OSINT) Solutions deliver a fully integrated ecosystem that enables analysts to move from data overload to mission insight.

ECS helps organizations reduce noise, accelerate analysis, and operationalize open data through mission-aligned technology, proven tradecraft, and ready-to-use workflows. Our approach combines secure infrastructure, modular tools, and expert support so analysts can focus on insight, not administration.

The ECS OSINT Capability

ECS delivers OSINT as a service, integrating engineering, compliance, and lifecycle support with training, alerting, and tailored workflows. The result: trusted intelligence at speed, aligned to real operational demands.

Fully integrated OSINT ecosystem designed for federal missions

Faster, more reliable intelligence through reduced friction and automation

Modular, interoperable solutions that scale with mission needs

No vendor lock-in—flexibility to adapt as requirements evolve

The ECS Difference

ECS bridges the gap between innovation and security. With decades of federal delivery and data engineering experience, we integrate commercial technologies with government requirements to turn open data into actionable intelligence — faster, safer, and smarter.

ECS OSINT Toolkit™

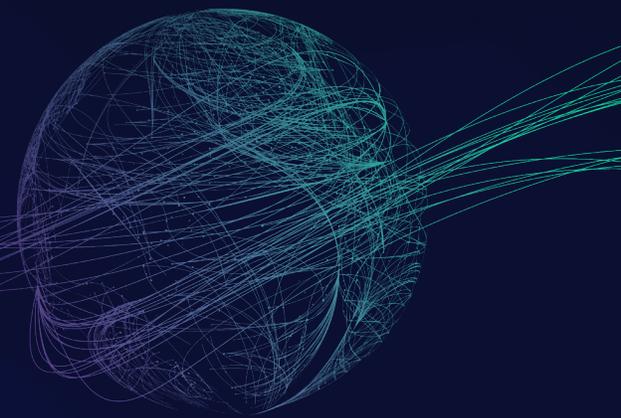

A Modular Toolkit of Best-in-Class PAI and CAI Technologies

The ECS OSINT Toolkit™ is a vendor-agnostic integration framework that allows customers to build a tailored toolkit of best-in-class technologies that are hosted, supported, and managed under a single contract.

ECS evaluates data sources, APIs, AI models, and compliance posture to ensure technical rigor and operational fit. We manage the environment and lifecycle so customers can focus on analysis, not infrastructure.

Toolkit Benefits:

- **Vendor-agnostic architecture** that eliminates lock-in
- **Unified access** through a secure platform
- **Continuous technology refresh** and vendor accountability
- **Training, compliance, and support** built in

ARGOS Alert

Mission-Relevant Intelligence at Speed

Argos Alert is a secure, cloud-native SaaS solution delivering clear, prioritized alerts when and where analysts need them. Built for trust, scalability, and cost efficiency, Argos Alert filters global open-source data to provide timely insight without overwhelming analysts.

Real-time ingestion from global open sources

Configurable alerts with imagery and video

Low-latency delivery across secure channels

Available via rapid procurement pathways

Argos Alert is available now on the NASA SEWP V (Group A) contract vehicle, enabling fast, low-risk acquisition.

Tradecraft, Training, and Secure Infrastructure

Optimizing OSINT to Advance the Mission

ECS delivers industry-leading OSINT tradecraft and toolkit training to enable deeper, more precise collection and analysis in complex digital environments.

Mission Applications:

Penetration Testing and Purple Teaming

High-fidelity intelligence beyond automated scanners, including target surface mapping and hidden exposure discovery

Law Enforcement

Ethically sourced, operationally relevant intelligence for faster investigations and improved case outcomes

Government and National Security

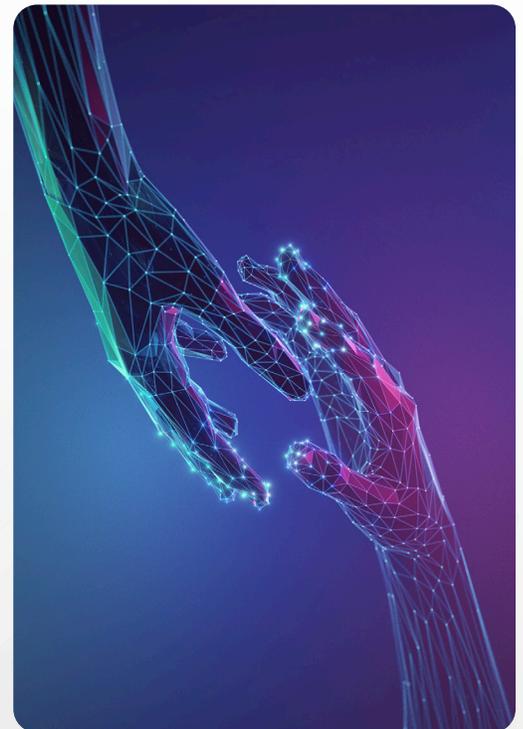

Strategic intelligence, real-time situational awareness, and early-warning indicators to protect national interests

Secure Infrastructure for OSINT Analysis

ECS Mission Partner Environments (MPEs) provide protected, cloud-native workspaces purpose-built for OSINT. Zero-trust security, policy-based access controls, and ECS-managed infrastructure reduce attribution risk while enabling secure collaboration.

Infrastructure Highlights

- **Protected analyst access** across commercial and government networks
- **CAC-enabled**, audit-ready controls
- **Scalable environments** supporting IL5 and beyond
- **Integrated** with OSINT tools, analytics, and ECS tradecraft programs

ECS acts as your OSINT integrator: curating technologies, managing relationships, and ensuring access to the right tools at the right time.

From the boardroom to the battlefield, ECS empowers your mission, amplifies your impact, and drives lasting results with frontier technology solutions. Our highly skilled teams bring the best of innovation to urgent mission needs across the U.S. public sector, defense and intel, and commercial industries, with a focus on efficiency and impact. ECS maintains partnerships with leading AI, cloud, and cybersecurity technology providers and holds specialized certifications in their technologies.
